

SG Digital

Starter Kit on SGQR

SG QR

DID YOU KNOW?

SGQR is a single payment QR code that combines the QR codes of different electronic payment schemes. Consumers just need to look at the bottom of the SGQR label to see which payment option is accepted by the merchant.

STEP 1 Install your preferred mobile payment app on your mobile phone

Go to the **Apple App Store**  or **Google Play Store**  to download any of the payments apps supported under SGQR and launch the application.

Examples of Payment Apps Supported under SGQR

STEP 2 Scan SGQR and make payment

1. Launch your preferred payment app's built-in QR code scanner to capture the SGQR.

2. Scan the SGQR displayed by the merchant and check the merchant name.

3. Enter the transaction amount and verify the merchant name in your mobile phone before proceeding with the payment.

4. You will receive a payment notification message. The amount is immediately deducted from your e-wallet/account and credited to the merchant.

Note: Steps to scan SGQR and make payment will vary for different payment apps.

STEP 3 View transaction history and manage notifications

5. Tap on 'History' to view your transaction history.

6. Tap on 'More', 'Settings' to manage notifications.

7. Tap on 'Manage Notifications' to manage alerts and notifications for transactions.

Note: Steps to view transaction history and manage notifications will vary for different payment apps.

Cyber security tips (Credit: Cyber Security Agency of Singapore)

- **Never disclose** your mobile banking or payment wallet User ID, PIN & One-Time Password (OTP) to anyone.
- **Check** the payment wallet to ensure that the merchant name and amount are correct before payment.
- **Download** apps only from official sources.
